

1. System Priorities

Which three of these do you prefer?

Amenities

Many bus stops have no benches

No shade, lighting, or protection from weather

Not entirely ADA compliant or lack other amenities

A

Adding more shelters, benches, amenities at stops

B

Better signage / wayfinding to inform the riders

C

More accessible bus stops, sidewalks, ADA ramps, etc.

Route

Frequency makes transit more useful

High-frequency transit needs high population and employment

The more homes/jobs closer to bus stops, the higher ridership is

D

Add routes in areas that don't currently have service

E

Adding more frequent service in places that have it

F

Higher frequency service (shorter waits)

Service

Changes based on time of day and day of week

Operate at 30-min. frequency at peak and hourly during other

Runs less frequently or not at all on weekends

G

More service at midday

H

More service at night

I

More service on the weekend
