

2. Waiting or Walking?

1A

5 min.

A bus route that stops within a 5 minute walk of your house

1B

10 min.

A bus route that stops 10 minutes from your house

VS

2A

A bus route that stops at the destination's front door

2B

A bus route that stops a block away from the destination

VS

Riders can wait at home

<
1/4mi.

Walk increases by no more than 1/4 mile

A stop at the nearest intersection

Keeps stops with transfer points and high ridership

Buses are more infrequent because of redundant stops

Prioritizes stops near healthcare, schools, large employers, community centers, and grocery stores
